Internship

Software Engineer Intern | *Python, React, Node.js, Web Development* **Jul 2025 - Present**
Eduniketan Pvt Ltd.

- Engineered "TheEducode," a comprehensive web-based learning platform, implementing secure examination environments and interactive coding problem modules to elevate the student learning experience.
- Optimized application architecture and resource delivery pipelines, ensuring seamless, low-latency access to educational materials and courses while maintaining high platform stability during peak usage.
- Directed content management initiatives by designing and structuring comprehensive study materials; authored detailed PDF guides and developed interactive algorithmic challenges (including a complete C programming curriculum), establishing the platform's core educational resources.
- Optimized application architecture and resource delivery pipelines, reducing page load times by **[30]%** and ensuring seamless access to educational materials while maintaining **[99.9]%** platform stability during peak usage.

Projects

Sumo Cars.io | *Multiplayer Arcade Territory Control Game | Unity (3D), C#, NGO* **Aug 2025 - Present**

- Developed a real-time multiplayer .io game (up to 8 players, Android + PC cross-platform) where players drift cars to paint territory, featuring sumo-style knockback combat, two-tier boost mechanics, per-pixel territory scoring with live leaderboards, and timed competitive rounds with automated match flow.
- Built a modular vehicle system (physics, boost, respawn, VFX) with ground-raycast death detection, dramatic respawn animations, and a dynamic per-player trail instantiation
- system supporting 8 unique visual identities with zero material duplication.
  Repository Link: **https://github.com/UJJWAL16895/Sumo-Cars-Unity**

Solid Waste Collection Route Optimization | *Python, ML* **Nov 2025 - Jan 2026**

- Engineered a route optimization system to solve the Vehicle Routing Problem (VRP) for solid waste collection.
- Applied clustering algorithms (K-Means) and heuristic models to minimize travel distance and fuel consumption.
- Processed geospatial data to generate efficient collection routes, demonstrating strong application of ML in logistics.
- Repository Link: **https://github.com/UJJWAL16895/route-optimization**

Certificates / Certifications

Cloud Computing **Aug 2025**
Nptel — Certificate Link

Advance Dsa Training **Jul 2025**
Programming Pathshala — Certificate Link

Skills

Languages: C, C++, Java, Python

Tools/Platforms: Unity, Blender, Git, Streamlit, Blender, Visual Studio, Jupyter Notebooks

Core Concepts: Multiplayer Networking, OOPs, Data Structures & Algorithms, Physics Simulation (Blender)

Machine Learning: Scikit-Learn (TF-IDF, Cosine Similarity), K-Means, XGBoost, Pandas, NumPy

Domain Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design, Scripting in Python and JavaScript

Soft Skills: Communication & Collaboration, Leadership & Management

Education

Lovely Professional University **Since Aug 2023**
Bachelor of Technology - Computer Science and Engineering — CGPA: 7.57 *Phagwara, Punjab*

Lal Bahadur Shastri **2021 – 2023**
12th — Percentage: 71% *Patna, Bihar*

Christ Church Diocesan School **2020– 2021**
10th — Percenatge: 72.56% *Patna, Bihar*
